**IMPORTANT INFORMATION**

**Past performance is not a guarantee of future results.** No assurance can be given that the Strategy will be successful. The performance of the Strategy can be volatile and involve a high degree of risk. Investors may lose some or all of their investment.

Gross returns do not include the deduction of the Adviser's fees and expenses. Small Cap Core Equity Composite net performance results shown are reduced by a model fee of 0.80% annually and include the reinvestment of all income. Actual investment advisory fees incurred by clients may vary.

Palisade Capital Management, LP ("Palisade" or the "Firm") is an SEC registered independent investment management firm established in 1995. Beginning December 31, 2007, Palisade was redefined to include private equity investments. Based in Fort Lee, NJ, Palisade manages a variety of assets for a diversified client base including institutions, foundations, endowments, pension and profit-sharing plans, retirement plans, mutual funds, private limited partnerships, family offices, and high net worth individuals. Registration with the Securities and Exchange Commission does not imply a certain level of skill or expertise.

Palisade Capital Management, LP claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. To receive a complete list and description of the Firm's composites and/or a presentation that adheres to the GIPS® standards, please contact Allison J. Chase, CIPM at (201) 346-5742 or achase@palcap.com.

The Small Capitalization Composite includes all fee-paying, discretionary, taxable mutual funds, taxable and tax-exempt institutional portfolios invested in equities with increasing earnings and free cash flow, core characteristics, and small capitalizations. Prior to January 1, 2012, taxable mutual funds and taxable accounts were excluded from the composite. Effective January 1, 2016, any account in the composite that has a cash flow withdrawal or deposit of 50% or greater of the assets of the account will be removed from the composite for that month and will be added back in the following month. The minimum account size for this composite is \$1 million. Prior to April 1, 2008 the minimum account size was \$10 million, and prior to January 1, 2009 the minimum account size for this composite was \$3 million. The Small Capitalization Composite creation date and inception date is March 1, 1995. For each period presented, the composite did not contain any wrap fee portfolios.

Holdings, sector weights, and characteristics reflect those of the Small Capitalization Composite. Holdings and weightings are subject to change at any time at Palisade's discretion. Individual portfolios may vary. It should not be assumed that any of the securities transactions or holdings shown were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities shown herein. The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any security discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. Information is supplemental to the composite disclosure presentation, which is available upon request. Discussions regarding potential future events and their impact on any portfolio are based solely on historic information and Palisade's estimates and/or opinions, are provided for illustrative purposes only, and are subject to further limitations as specified elsewhere in this material. No guarantee can be made of the occurrence of such events or the actual impact such events would have on any portfolio's future performance.

Palisade is the source of all data unless otherwise noted.

The Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. It consists of approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. Source: London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). © LSE Group 2026. The Small Capitalization Composite (the "Composite") has been developed solely by Palisade Capital Management, LP. The Composite is not in any way connected to or sponsored, endorsed, sold, or promoted by the LSE Group. FTSE Russell is a trading name of certain of the LSE Group companies. All rights in the Russell 2000® Index (the "Index") vest in the relevant LSE Group company which owns the Index. Russell® is a trademark(s) of the relevant LSE Group company and is used by any other LSE Group company under license. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on, or any error in the Index or (b) investment in or operation of the Composite. The LSE Group makes no claim, prediction, warranty, or representation either as to the results to be obtained from the Composite or the suitability of the Index for the purpose to which it is being presented by Palisade Capital Management, LP.

Reference to an index does not imply that any strategy will achieve returns, volatility, or other results similar to an index. No index reflects the manner in which the portfolio for any strategy is constructed in relation to expected or achieved returns, portfolio guidelines, restrictions, sectors, correlations, concentrations, or volatility. Indices are unmanaged. It should not be assumed any strategy will invest in any securities that comprise the applicable benchmark, nor should it be understood to mean there is a correlation between any strategy's returns and the returns of the applicable benchmark. Benchmarks are included for informational purposes only.

## IMPORTANT INFORMATION

The information herein is correct to the best of Palisade's knowledge as of the date indicated and is subject to change without notice. This information is confidential and for the use of the intended recipients only. It may not be reproduced, redistributed, or copied in whole or in part for any purpose without prior written consent. This document is not intended for distribution to, or use by, any party in any jurisdiction where such distribution or use would be contrary to local law or regulation.

Specific investments described herein do not represent all investment decisions made by Palisade Capital Management. The reader should not assume investment decisions identified and discussed were or will be profitable. Specific investment advice references provided herein are for illustrative purposes only and are not necessarily representative of investments that will be made in the future.

Certain information contained herein has been obtained from third party sources and such information has not been independently verified by Palisade Capital Management, LP. No representation, warranty, or undertaking, expressed or implied, is given to the accuracy or completeness of such information by Palisade Capital Management, LP, or any other person. While such sources are believed to be reliable, Palisade Capital Management, LP does not assume any responsibility for the accuracy or completeness of such information. Palisade Capital Management, LP does not undertake any obligation to update the information contained herein as of any future date.

Investing in securities involves risk, including the risk the entire amount invested may be lost. Securities investments are not guaranteed. Palisade's valuation predictions may not be correct and/or achieved within the anticipated time frame. A risk in a long-term purchase strategy is that Palisade may not take advantage of short-term gains that could be profitable. Moreover, if Palisade's predictions are incorrect, a security may decline sharply in value before being sold. Equity securities fluctuate in value in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete, industry market conditions, interest rates, and general economic environments. REITs are affected by underlying real estate values, which may have an exaggerated effect to the extent that those REITs concentrate investments in particular geographic regions or property types. Palisade's portfolios are susceptible to operational, information security, and related risks from cyber security incidents resulting from deliberate attacks or unintentional events.

The statistics reflect the Composite characteristics (gross of fees) and the indices as of the date shown. The 5-Year Risk statistics provided are not related to or indicative of either the Composite's or the indices' performance.

Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of the Strategy and compares its risk-adjusted performance to a benchmark index. The excess return of the Strategy relative to the return of the benchmark index is the Strategy's alpha.

Beta measures the relationship between the Strategy's excess return over T-bills (representing a risk-free rate) relative to the excess return of the Strategy's benchmark. A low beta does not imply a strategy has a low level of volatility; rather a low beta means the strategy's market-related risk is low. Beta is often referred to as systematic risk.

Annualized standard deviation is a measure of the dispersion of a set of data from its mean – a measure of the variability of returns. The higher the standard deviation, the greater the range of performance (i.e., volatility). Standard deviation is calculated as the square root of variance.

The Sharpe Ratio is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical risk-adjusted performance.

Tracking error measures the standard deviation of the excess returns a portfolio generates compared to its benchmark. If a manager tracks a benchmark closely, then tracking error will be low. If a manager tracks a benchmark perfectly, the tracking error will be zero.

The Downside Capture percentage measures a manager's performance in down markets relative to a particular benchmark. A down market is one in which the market's quarterly (or monthly) return is less than zero. For example, a downside capture percentage of 50% means the portfolio's value fell half as much as its benchmark index during the benchmark's negative quarters. A downside capture percentage of less than 100% indicates a manager who outperforms the relative benchmark in the benchmark's negative quarters.

The Upside Capture percentage is a measure of a manager's performance in up markets relative to a particular benchmark. An up market is one in which the market's quarterly (or monthly) return is greater than or equal to zero. For example, an upside capture percentage of 50% means the portfolio's value increased half as much as its benchmark index during the benchmark's positive quarters. An upside capture percentage of more than 100% indicates a manager who outperforms the relative benchmark in the benchmark's positive quarters.

Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.
